ABOUT ME

I'm Qaidar Qabil, a Software and Mobile Developer with a BSc in Computer Science from the University of Duhok. I specialize in cross-platform mobile app development using Flutter and Dart, and I have strong experience across languages like Java, Python, C++, C#, JavaScript, and SQL. My work often bridges software and hardware — with hands-on experience integrating IoT systems to create smarter, connected solutions. I'm also skilled in machine learning and AI, particularly in data classification and intelligent system design. I'm passionate about building scalable, user-friendly apps that interact seamlessly with real-world devices and data.

EDUCATION

Bachelor of Computer Science
University of Duhok 2024-2025

SKILLS

- Communication
- Data Classification with Python
- Time management
- Organization
- Creativity
- Research

LANGUAGES

- Kurdish(Mother Language)
- English (Intermediate)

EXPERIENCE

Face Detection Attendance System

Personal Project – Python | OpenCV | Machine Learning

Duration: Jan 2024 – Apr 2024

- Developed a facial recognition system to automate student attendance using Python and OpenCV.
- Trained a custom face detection model to identify and verify student identities in real time with Firebase.
- Improved attendance tracking accuracy and reduced manual effort in classroom environments.

Heart Disease Classification System

Machine Learning Project – Python | Scikit-learn | Pandas

Duration: Jan 2024 – Mar 2024

- Designed and trained machine learning models to classify the likelihood of heart disease using medical datasets.
- Applied supervised learning algorithms such as Decision Trees, Random Forest, and Logistic Regression.
- Evaluated models using accuracy, precision, recall, and confusion matrix metrics.

COMPUTER PROGRAMS

- Microsoft Office Programs
- VsCode Editor
- Anaconda(Python)
- Android Studio
- Arduino
- Visual Studio Code Editor
